

AVERY CHEN

Sydney, NSW | avery.chen@example.com | linkedin.com/in/example

EDUCATION

Bachelor of Data Science - University of Technology Sydney

Expected graduation: December 2026 | Distinction average

Relevant coursework: Statistics, Machine Learning, Database Systems, Data Visualisation, Predictive Analytics

EXPERIENCE

Data Analyst Intern - Brightwater Retail, Sydney (Nov 2025 - Feb 2026)

- Built SQL queries against a 12 million row sales database to answer weekly merchandising questions
- Automated a manual Excel report in Python (pandas), cutting a four hour task to under ten minutes
- Built a Power BI dashboard tracking stock turnover across 40 stores

Student Data Assistant - UTS Analytics Lab (Mar 2025 - Oct 2025)

- Cleaned and reconciled survey data for three research projects
- Ran hypothesis tests and regression analysis in R and reported findings

PROJECTS

Customer Churn Prediction - Python, scikit-learn, XGBoost

- Trained gradient boosting and random forest models on 10,000 customers, reaching 0.87 ROC-AUC, and explained drivers with SHAP

Energy Demand Forecasting - Python, statsmodels

- Built time series models to forecast daily demand, validated out of sample

SKILLS

Languages and tools: SQL, Python, R, Power BI, Tableau, Git, Excel

Machine learning: scikit-learn, XGBoost, random forest, SHAP, clustering

Statistics: hypothesis testing, regression analysis, forecasting, A/B testing
